I'm not sure if I can help you with problems related to services, because I've been on the network since I got in the way and didn't solve the problem. Disable usb debugging 8. If you make any progress, post your solution here. If you already have, download and install Samsung USB Drivers for your phone from your phone manufacturers their website. Once completed, your device should appear in the bottom DFS window of the CDMA tool, remember that you may need to remove and add the port again. I was missing my MEID because it showed the same as yours: B0000000 and everything worked perfectly on my phone, except for the service I can connect to the internet with WiFi, manage and use Apps, etc. You also have the opportunity to create and run scripts with AT and DM commands. Many people from busbar and it's WalMart with online beauty on provisions about yours. Key security is essential in these CDMA systems. Palm treo 800w .Center: Pixi. I hope this helps anyone who had the same happen to the phone!!! I have a Galaxy Aviator that has a bad MEID status posted all over my screen. Otherwise, you will also have to open the debug port of your phones or equivalent. You also have the opportunity to reset used copies of the CDMA Workshop. This account will expire in 12 months. Pay once - use life time. Try posting the results... So, through the search that I find with this, I follow the instructions and get to where the CDMA tool should read my SPC and enter the information of my phone's equipment. In many cases, sending the correct 16-digit security password will allow you to use this method, for example. Modems 3G Pantech UMW190, UML290, Samsung U810, etc. Any help would be amazing, thanx!!! was connected to network before you lose your media or still need to activate your account with the provider?
